- 1 - Remove rear seat.
 - 2 - Remove side panels by removing (2) allen bolts by tank.
 - 3 - Remove front seat.
 - 4- Remove center piece of tail section by removing (2) allen bolts on top, slide bodywork up and back.
 - 5- Remove right side body work by removing (1) allen bolt on top and (1) plastic rivet, lift up and slide forward.
 - 6- Disconnect tail light wire and marker light wires.
 - 7- Remove rear fender by removing (4) allen bolts located in the rear storage area.
 - 8- Mount "DMP Fender Eliminator" bracket by using the (4) stock 6mm bolts and supplied washers and locknuts.
 - 9- Mount marker lights and license plate light (not included) per manufacture recommendation.
- Note: To complete your installation we recommend using DMP Marker Lights and DMP OEM Type Wire Harness, which are available from your local DMP dealer or www.moto911.com.
- 10- Reinstall bodywork and seat using stock hardware.
 - 11- Check lighting for proper function.
 - 12- Remaining hardware to be used for mounting license plate.

Use blue thread locker to secure bolts. Refer to owner's manual for proper torques.
