1 -Remove the front and passenger seat.

2 -Remove the rear tail section body work bolts and rivets (make sure all rivets and bolts are removed).

3 – Remove the four fender bolts from underneath the tail section.

4- Locate the plate light from inside the tail section. Remove the stock fender and tail section body work. Unplug the plate light connection. Fender should come right off.

5- Mount Fender Eliminator Kit using the (4) 6x16mm button head bolts and (4) 6x15 (larger) 6mm washers.

6- Connect License Plate light (not included) wire and check for proper function.

8 - Reinstall body work.

9- Remaining hardware to be used for mounting license plate.

Use blue thread locker to secure bolts. Refer to owner's manual for proper torques.
