

Yamaha CB300F Frame Slider Installation
Instructions
Part Numbers: 750-3120, 750-3129, 710-3129

MADE IN THE USA!

Carefully read instructions in their entirety before the install

Professional installation is recommended. Always use proper safety measures during the install of this product. Do not try to install this product without proper tools, recently calibrated torque wrench, correct torque specifications from **factory service manual**, safety goggles and gloves. The motorcycle must be in a fixed secure position before the install process begins. **DO NOT** remove both engine studs at the same time. **Shogun is not responsible for any part of your motorcycle for any reason.** Precisely measure location of cut and if in doubt at any point please call us before the install process has begun.

Replacement Parts List: Left Side Components (as if you were sitting on the bike)

QTY	Price each	Part Numbers	Descriptions

1	\$25.00	99-FS-715-3129-R	PA2 Right Side Puck (Insert and 2 Screws Included)
1	\$45.00	99-FS-710-3129-R	Carbon Right Side Puck (Black Cap and 5 Screws Included)
1	\$3.50	99-HB-SH10125100	Socket Cap 10 X 1.25 X 100 Main Engine Stud

Frame Sliders: Left and right same.

Installation Steps:

1. Remove the right side bolt (engine hangar top bolt shown in the photos). Mount the right side puck with (99-HB-SH10125100) Socket Cap 10 X 1.25 X 100 and torque down to the proper OEM torque specifications.
2. Remove the left side bolt (engine hangar top bolt shown in the photos). Mount the left side puck with (99-HB-SH10125100) Socket Cap 10 X 1.25 X 100 and torque down to the proper OEM torque specifications.

READ CAREFULLY

Shogun cannot guarantee that they will protect your motorcycle from any extent of damage. Shogun frame sliders are really meant to help possibly save the frame from damage in the event of a crash. Because Shogun frame slider products have been successful in saving cases, bodywork, levers and so on in the past, customers just assume sometimes you can put the product on and no damage will happen. The fact is, some crashes result in little or no damage to the motorcycle and some bikes are destroyed. It's kind of like a bumper on a car sometimes it works sometimes it doesn't, it really depends on all the different forces applied during the incident. We've seen bikes crash at 100 mph with little damage and some at 15 mph with major damage.
